Sony is having a hard time with the word "friction". They think it will be taken out as clickbait. They obviously don't know about our strategy but let's stick to the words of "challenge" and the role you had as director to get everyone to come together and be on the same page to create something beautiful. LOVE what you're saying about the intimacy coordinators and stunt coordinators and how involved Blake was in the scenes to ensure everyone felt safe. That you took a step back. That's EXCELLENT.
